

Shimmer Research and Insight Diagnostics announce Partnership

PRESS RELEASE

Cambridge, MA October 7, 2009. Insight Diagnostics Inc (IDI) presented at the First Shimmer Technology Exchange at Harvard University.

Shimmer Research and Insight Diagnostics, Inc have partnered to bring state of the art technology for the diagnosis and treatment of soft tissue injuries into a wireless format. IDI's proprietary technology Electrodiagnostic Functional Assessment, EFA brings physicians and insurers an innovative non invasive way to evaluate previously elusive soft tissue injuries. *Shimmer*[™] is a small wireless *sensor* platform designed to support wearable applications. The partnership between Shimmer Research and IDI will enhance the technology for delivery of the Electrodiagnostic Functional Assessment. IDI is using Shimmer Research's technology to make the new device most effective for diagnosis of soft tissue injuries. The new device can have profound implications for cost effective evaluations of soft tissue related injuries and can even make inroads in cardiac monitoring.

Dr. MaryRose Reaston, President of Insight Diagnostics Inc. believes "Our partnership with Shimmer Research along with the commercial launch of our new product will make us the market leaders in soft tissue diagnostics. This new technology will enable us to globally assist people with previously undiagnosable problems and help them receive the appropriate treatments. We at IDI see this as groundbreaking to be able to help reduce or eliminate unnecessary treatments and reduce pain." Phil Reaston, CTO of Insight Diagnostics Inc. supports this "The technology and support that we are receiving from Shimmer Research has greatly benefited IDI."

Kieran Daly VP Business Development – Shimmer Research "We are delighted to work with Insight Diagnostics, Inc and are very excited by the potential of this relationship. Our joint efforts will enable IDI to further advance their EFA technology which will firmly establish the company as market leaders in their field. "

About Insight Diagnostics Inc

Insight Diagnostics Inc is the service provider for the EFA. Their specialists have been innovative in helping to identify and resolve soft tissue injuries. For more information about Insight Diagnostics, Inc visit our website at www.insightdx.com.

About Shimmer Research

Shimmer is a wireless sensor platform that allows the user to record and transmit a wide range of physiological data. Shimmer enables interaction with your environment by providing a wireless sensing solution that is small, lightweight, and has low power consumption, which can easily integrate and interact with existing technologies.
